

Profile Page Specifications

Profile Pages

£600 per annum

Profile pages deliver a virtual shop window to the industry providing a continuous reference point throughout the year. In effect, a microsite within the Agg-Net portal, they allow visitors to buy into your proposition by researching what your company has to offer.

To get your profile page live, please e-mail us:

- A JPEG of your **company logo** and an overview of your business in no more than **500 words**. Your **About us** tab will then be activated

Make the most of your profile page functionality by providing the following items to open up other sections:

- **Press releases** for a dedicated **News** section
- **PDF's** (up to 3mb in size) for users to access in a **Downloads** tab. Post brochures, product specifications and even detailed case studies.
- **Photographs** (JPEGs preferred) with **captions** to present in an **Images** gallery
- Up to four **Videos** (in FLV or MP4 format) to be hosted in a dedicated **Video** area. Additional videos can be added at £75 per item
- Website and other **Contact** information
- **Categories** classifications so your profile pages can be tagged correctly within the Directory
- **Technical papers** for the **Articles** tab

Changes can be made at any point during the year with a turnaround time of three working days

Agg-Net reserves the right to refuse the posting of inappropriate material

*Please note the only compulsory tabs are the **About Us**, **Categories** and **Contact** sections. The other headings will not appear on your menu if there is no information behind them*

Over 100 companies are now running Profile Pages on Agg-Net
