

General Portfolio
Rulmecca UK Ltd

MISSION...

“ To be recognised as the world’s leading manufacturer and supplier of rollers, motorized pulleys and components for the global bulk materials handling market ”

Rulmeca was founded in 1962 and still has its headquarters based near the beautiful city of Bergamo in Italy.

Since 1962, Rulmeca has evolved through growth and acquisition to be the largest privately owned bulk handling conveyor component manufacturer in the world today with manufacturing plants strategically placed to give local supply .

Our UK facility is based centrally in the UK in Corby, Northants with a team of experienced and qualified personnel. We are able to supply all British and International standards to meet a continuously expanding and evolving bulk industry, whether it be in aggregates, mining, chemical, processing or an agricultural market.

GROUP MANUFACTURING

- Turnover: €150m
- 1100 employees
- 11 Production Centres
- 9 Sales Companies

LOCAL MANUFACTURING

Rulmecca UK's production is based at our purpose built factory in Corby, Northamptonshire.

Primary Tools

We have invested in the best purpose built primary cutting and welding machinery available.

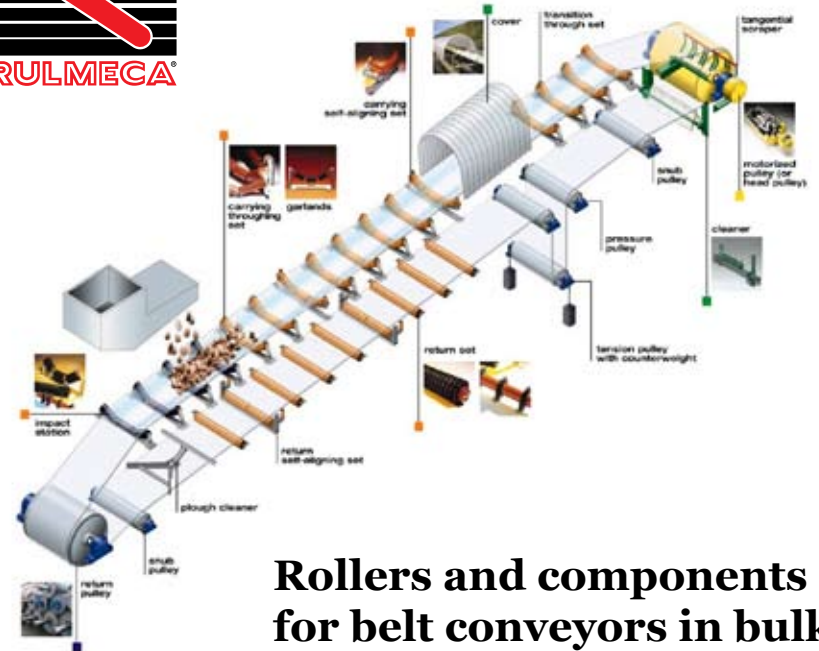

Automatic CNC shaft manufacturing gives consistent and accurate repeatability to the highest standards.

Semi-automatic press tools enable swift roller assembly and quick turnarounds.

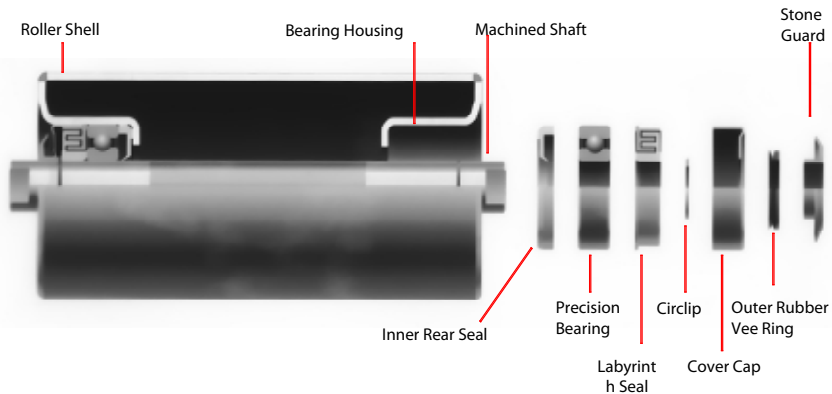

Quality Certification

Rollers and components for belt conveyors in bulk handling applications

Rollers: The PSV Sealing System

Thermoplastic Roller Range

Customer application

Rulmeca solution

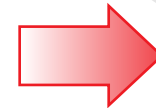

Light duty

Medium duty

Heavy duty

Rollers: Quarrying (Granite)

Rollers: Quarrying (Limestone)

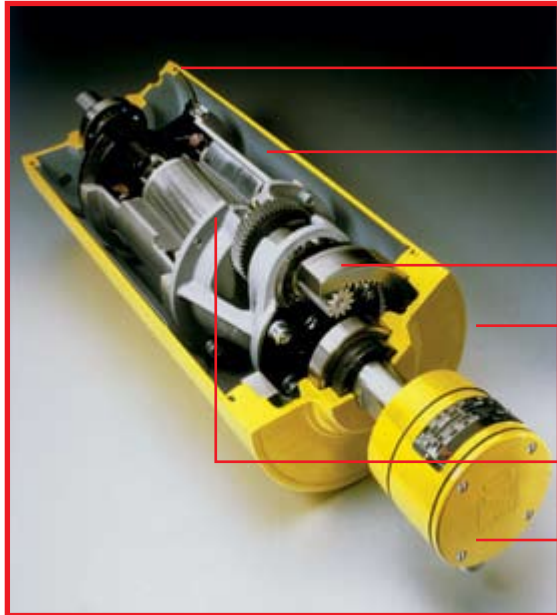

Rollers: Port Terminals (Coal)

Rollers: Power Stations (Coal & Ash)

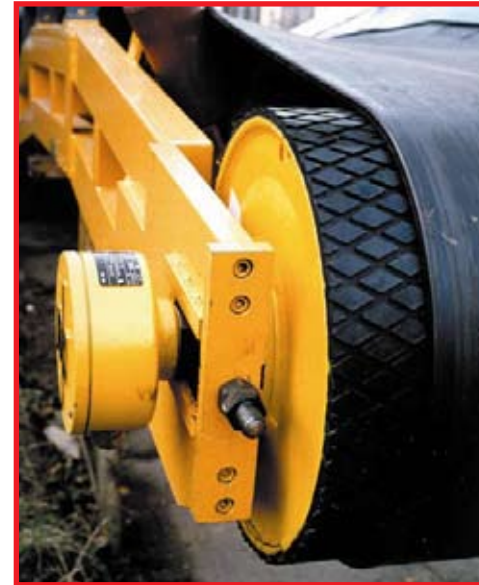

Motorized Pully Drives

- Stationary external shaft
- Permanently oil filled for cooling and lubrication
- Gearbox
- Rotating shell
- Electric AC Motor
- Terminal Box

Motorized Pulleys Features & benefits

- Totally enclosed
- Aesthetic and Compact space saving design
- Light and even weight distribution
- Increased Safety - One moving Part
- Minimal Guarding
- Low noise levels
- Fewer parts so more cost effective

Drives: Quarrying (Granite)

Drives: Quarrying (Sand & Gravel)

Drives: Dredging (Sand & Gravel)

Drives: Power Stations (Coal)

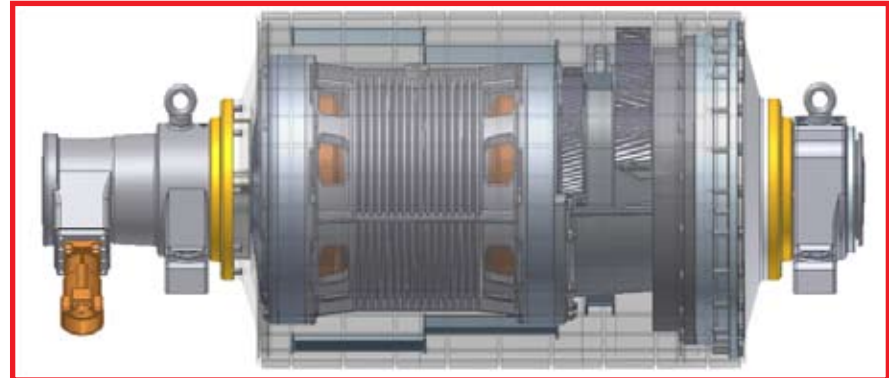

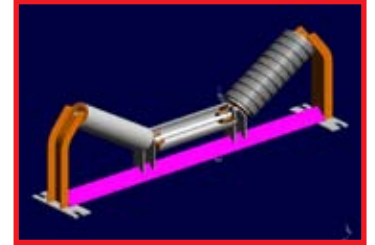

Before

After

Research and Development

Rulmeca have constant R & D into new areas of roller design, we are bringing forth bigger, better and more efficient products to ensure we remain world market leaders in an ever changing bulk market place.
